

FOR THE RECORD

“For the record, this is why I did it.”

A private Android journal for work and wallet decisions

CLOCK IN 2026 / Preview 0.3.1

The reason is easy to lose

A finished task shows an outcome.

A transaction shows an event.

The thinking behind either can disappear.

FOR THE RECORD keeps the intention, the result and a useful next action together.

Product hypothesis: a clear next action makes returning easier. Retention is not yet measured.

Leave tomorrow a starting point

Set an intention.
Do the work.
Save one next action.

**Return to your own words,
already filled in.**

 Ship a thoughtful app

Your intention

Test the same flow with large text

Your previous next action is ready. 34/240

ACTUAL ANDROID DEMO / SAVED NEXT ACTION

Keep the reason. Return with context.

A saved reflection keeps your reason and original plan close to the event.

Reopen it later.
Add what you learned.

Native MWA + public RPC. Physical Seeker and live activity remain to be verified.

FOR THE RECORD / 04

SAMPLE DATA / RECORDED APP

Reason

I wanted to test a small position after reviewing the project.

Plan

Keep the position small. Review the assumptions tomorrow.

Emotion

Calm

Clear data boundaries

On the device

SQLite keeps work records and private reflections.

JSON export gives users a portable copy.

Direct wallet reads

MWA supplies the selected public wallet account.

Public RPC supplies finalized activity.

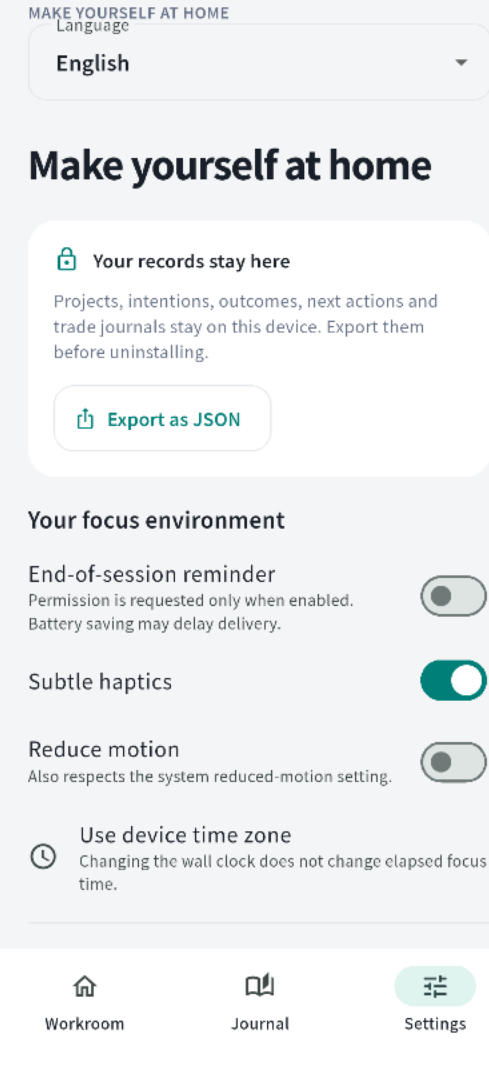

No paid server is required for the journal. Optional shared rooms and purchases remain separate.

An approachable phone experience

English by default. Eight language choices.
Your own writing keeps its language.

Optional motion, haptics and reminders.
Clear save and recovery states.
Local usefulness without a network.

EN KO JA ZH HI ES PT FR

Delivery status

Implemented

Offline work journal
Private reflection storage
Native wallet bridge
Direct read-only activity path

Open release gates

Physical Seeker + live activity
Fluent-speaker review
Production RPC strategy
Production signing

88 app tests pass. Manual mock-wallet connection verified. Fixtures are not live trading evidence.

Leave tomorrow a starting point.

Keep the intention.

Remember the reason.

Return to a clear next action.

Next: verify live activity on Seeker, then learn from returning users.
